RELEVANT
EXPERIENCE**BOLLORE LOGISTICS, TILBURY, ESSEX****NOV 2019 – JULY 2023****Front-End Software Developer/Analyst**

- Developed user-friendly UIs with HTML, CSS, and JS, enhancing the Transport Management System for better usability for 1600+ users and production increase across 8 branches.
- Implemented Agile and Waterfall methodologies during deployment of code, reducing deployment issues by 40%.
- Parsed and manipulated complex data formats (XML, JSON, Flat Files) and used SQL to filter database data and provide insights, improving client satisfaction. - Created stock reports for Aston Martin, streamlining information retrieval and improving client decision-making efficiency by 20%.
- Programmed stock reports to be displayed to our Aston Martin client, taking consideration how the data would be interpreted ordering the important information on the first column to make is easier for clients to highlight which Warehouse and the mode of transport their stock has taken on the report, followed by the stock information. Allowing for 60% increase in efficiency of cargo distribution as the client had more control in the quantity of stock being distributed to dealerships
- Adaptation of Transport Management Systems UI using the functionalities OpenEdge Progress (11.6) has to offer.

INNOCENT DRINKS, LADBROKE GROVE, LONDON**JULY 2023 – JAN 2024****Data Integration Analyst**

- Implemented an Azure Logic App to pull inventory reports from Azure Blobs into the Innocent database, ensuring seamless integration between systems increasing production of products by 20%
- Improved integration processes, increasing data flow efficiency and reducing delivery times by 25%.
- Utilized Azure Log Analytics to troubleshoot and resolve process failures, enhancing system reliability by 15%.
- Contributed to new infrastructure design, saving Innocent £100,000 per year in logistics costs.

UNIVERSITY OF EAST LONDON, BECKTON, LONDON**JULY 2019 – SEPT 2019****Data Administrator/Entry**

- Gathering of information via phone and MS Outlook to store in the UEL database system and ensuring GDPR adherence to prevent leak of sensitive data.
- System maintenance which involved the removal of applicant data that's become redundant, preventing duplication of data and prevention of data being misused.
